

YOUTH AND CLIMATE CHANGE

Long Term Goal

Building bridges between existing local and established global knowledge for youth so that they can find solutions to build climate resilient society.

Wht we do

Knowledge based semianars, trainings, workshops; bi-monthly radio shows on environmental problems and solutions and outreach through media- Fackbook pages,websites, twitter, radio shows etc.

Climate Youth Initiative Project

Youth Empowerment through skill development

ICCCAD's youth program seeks to involve the youth to come forward where young men and women can learn, understand and share aspects of environmental and social problems of climate change through capacity building.
